

DETAILED ACTION

Allowable Subject Matter

1. Claims 42-57 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. Regarding Claim 42, the closest prior arts, **Gore (US Patent No. 6,274,785 B1)** discloses the claimed process except for the step of contacting a second liquid comprising at least one hydrocarbon with a second oxidant in a second reactor and **Carr (US Patent No. 5,169,516)** discloses the claimed process except for the first and second oxidants are oxygen instead of the claimed peroxydicarboxylic acid. These two processes can not be combined since the process of Gore is operated by donating oxygen atoms to the sulfur in thiols and thiophenes to form sulfoxides or sulfones while the process of Carr is operated by oxidizing the mercaptans to form disulfides.
4. Claims 43-57 directly or indirectly depend on Claim 42.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
